# Mines and Prospects--Furnaces and Mills

# Utah's Blessings Continue to Flow

Dividends for the Past Month, the Roster From Which They Came, With Others to Follow.

From the lottery of the diggin's there as drawn in August dividends amounting to \$417,500, nor were all those by which dividends were earned In line. Conspicuous among the latter was Grand Central, for which it is claimed that tucked away in its stocking is enough for at least two regulars and then some, without reference to reand then some, without reference to reserves that are piled up under ground and while Utah of Deep Creek absented itself, more than the equivalent was applied to surface improvements and exploratory work that has added, according to yesterday's report from Superintendent Charles Crismon, materially to its resources. However, terially to its resources. there is no apology coming from any one on the month's exhibit. To swell the aggregate the United States Mining company appeared with a distribu-tion of \$200.000, this the first of a list that shall come as the management decrees in the future, while the Silver King stepped up with the usual pot in which was contained \$100,000, with an-other in corresponding amount to be posted today. Daly West, whose genposted today. Daly West, whose generous household has been almost too prodigal, perhaps, in the treatment of its flock, some of whom have lapsed into criticism quite harsh, maintained. Its position, as did Mammoth, while lts position, as did Mammoth, wi quarterly dividends from a number sources will mature the present month The roster during the past month consisted of the following.

Daly West	72,000
Mammoth	20,000
Mammoth	100,000
Sacramento	5,000
Tetro	3,000
United States	200,000
Uncle Sam	5,000
Total	117,500

To the present list everything fore-To the present list everything fore-tells a number of acquisitions during the last half of the year. Boston Con. is now, indeed, adding about \$20,000 monthly to its surplus, with Bingham Con. in the same conclave of Bingham bonanzas exceeding that, while of Horn Silver it is said that it will probably increase its dividend around the holidays. Yankee Con is holding out substantial hopes to those who have remained in the band-wagon, and while Yampa of Bingham is setting aside its earnings for more liberal equipment it is none the loss to its credit.

## PARIS'S GOLD FINDS.

Acquires Rich Territory in California's Gold-Bearing Regions.

A letter from Joseph H. Paris, who, with J. A. Macdenald, sought the diggings at North Fork, out of Carryllle, Trinity county, Colo., indicates that his dreams of wealth are about to fructify and that when he returns to this State with whose camps he was actively identified for several years, it will be with money to burn. In the California camp, he with Mr. Macdonald, has acquired not enly a group of lode claims fissured by five well-defined ledges, but has purchased a piece of placer ground, the auriferous contents of which have long been demonstrated. According to assays made by Currie of this city, to whom the samples were forwarded, the ore contained in the ledges shows an average of \$23 gold per ton, with some of the rock revealing as much as \$18.29, and before the close of another year the intention of the owners is to have a stamp mill in commission. To tap the first of the systems of ledges the ewners are now driving a tunnel, which will connect with it in the next foriy-five feet. The campaign will then be in the direction of the parallel veins, the work to continue throughout the winter. That Mr. Paris and his associate have got it rich a large circle here will be gratified to learn. with whose camps he was actively identi-

# AT THE UTAH MINE.

Conditions Throughout Look Good to Superintendent of the Property.

A lengthy report from Superintendent Charles Crismon of the Utah mine at Fish Springs which yesterday reached the local offices of the company indi-cates a most gratifying condition in that Deep Creek property from which over \$200,000 in dividends have been de-rived. In his report the superintend-ent calls attention to ore in a great number of localities within the comnumber of localities within the com-pany's domain, and it is doubtful if its resources have ever been greater than at present. Indeed the belief is encouraged that a dividend will be pass round the present month. Another carload of ore was sold during the day on contracts showing as much as 47 per cent lead with 96 ounces silver per

# TO INCREASE OUTPUT.

Blue Bell to Be Drawn on for Additional Tonnages of Ore.

Capt. Duncan MucVichie came in from the Engle & Blue Bell of Tintic yesterday morning and reports the ove bodies in that property responding mast generously to new development, with the output to be materially increased the present month. The ores are running quite satisfactorily in silver and gold, with the percentage of copper gradually increasing, and Superintendent Creighton, who has everything in hand, is looking forward to a day when he shall be permitted to make a record. Of the new channel-of lead ore in Dalton ground at Bingham, Capt MacViche says it shows about thirty increas of the high-grade ore, to which reference was made yesterday, the rock piling rapidly into tonnage. day morning and reports the ove bodies in

# MAMMOTH DIVIDEND.

Directors Gather and Order Distribution of \$20,000 September 15.

The Mammoth Mining company will pay the usual dividend of 5 cents a share, or \$20,000, September 15, the transfer books to close on the 9th. This was authorized at a meeting of the board of directors yesterday, the contents of the company's stocking not only affording this distribution, but revealing a most gratifying surplus.

Western Cre Shippers' Agency. 163 Main st. P. O. box 457. Phone 2000. MONTH ON CHANGE.

But \$126,000 Required to Do the Business During the Dog Days.

The month on the mining exchange

the sale of 423,263 shares of stock, for \$126,220, the day with the transfer of 15,750 shares, that brought but \$1329.63. The trading throughout August was lifeless, the market practically devoid of feature, unless it was the evidence it volunteered at intervals that the bottom had been reached. The woes of Daly West were, perhaps, the keenest felt, although they were reduced around the close, when it changed hands at \$12.70, with another dividend to be posted on Monday next. The unexpected withdrawal of Grand Central from the dividend column felt with benumbing effect upon its flock, which had been relying on it for increased earnings, while the sudden fise and subsequent decline in Con. Mercur added to the confusion. The Judge was among the exceptions, and while trading in its shares was light, it was upon steady gains, while Boston Con sprinted to \$1.25 and Horn Silver to \$1.26 bid. Although a bare pinch of the King was released by some unfortunate holder at \$14 during the month, he saw it raily and close on a bid of \$19, with none to be had at less than \$22 yesterday, while Mammoth, which will post its September dividend next week, was not to be had at less than \$1.50. Tetro, which is paying its flock a cent a month, hefored from the torpor of deg-days and was wrapped up to bids around. were, perhaps, the keenest felt, although

### THE USE OF COKE.

Employment of It in Pyritic Smelting Under Discussion.

Discussing the amount of coke to be used in pyritic or partial pyritic smelting, the Mining and Scientific Press of California says it cannot be determined, nace-which cannot be kept constant even with a constant grade of ore and the same fluxes. It is easy to use too much coke. The result of heavy overcharges of coke is generally the driving of the fire upward, and the accumulation of a small ters mentions an instance in Arizons where the furnace was in bad condition; the siag only red hot, and scanty, and apparently very alliceous. All of the ter coke charge was maintained at 300 pounds, but instead of small charges of ore such us had previously been fed, they charged 200 pounds of old ferruginous slags. These were continued for five charges when one-half of the siag was replaced when one-half of the siag was replaced by ore, and later ore was gradually substituted for the remaining sing, at the rate of forty pounds of ore for 100 pounds of sing, so that the normal charge became 2100 pounds of ore to 300 pounds of coke, with the addition of a small amount of foul sing made by the furnace. After several hours, the tuyeres began to brighten, one by one, and after a time the running of furnace became normal. The ores were exidized. With sulphide ores the amount of coke used is much less than with oxidized ores, as the sulphur of the ore supplies a large amount of the necessary fuel.

# August's Output Beats All Records

Unprecedented Totals Reached by the Month's Settlements in Ore and Bullion Market.

August, in the ore and bullion market, closed on settlements aggregating \$2,317,900, this stupendous exhibit, which exceeds all previous records, compared with a total of \$1,171,500 for the corresponding month last year. Indeed the record of transactions in the open market is the loftlest in the history of mining in Utah, while to it may be added \$1,000,000, this, on the most conservative estimates, the sum derived from the sales of copper bullion con-taining gold and silver by the owners of the copper smelters. Nor has a single source from which this splendid volume of wealth is mined been distressed. On of wealth is mined been usuated the contrary, there has been an enforced curtailment of the output at some of the producers, the management at some of the furnaces, at least, pleading that it must have an interval in which to reduce the unprecedented tonnages to reduce the unprecedented tonnages of ore beneath which their bins are staggering. And yet the American blew in another furnace during the week, while the Bingham is now installing a fifth and preparing with other equipment to make a record in the next thirty days. At the United tSates smelter work on the lead-smelting plant is progressing most satisfactorily, said George K. Fisher, superintendent of construction, and with all the enlargements now in hand relief must be afents now in hand relief must be af-

ments now in hand relief must be afforded.

At the Yampa smelter in Bingham canyon orders have been issued that will result in the doubling of its capacity, while in the same camp the new Queen mill has —t gone into commission on Butterfield ores. At the Utah Copper company's mill, from which a carload of high-grade copper concentrates containing gold and silver are coming daily, the capacity is being materially increased, as is also that with which the Ohio Copper company is equipped. Over at Park City the mills are putting forth their normal tonnages, with the output of the new concentrator at the Kearns-Keith to be more than doubled in a short time, while at the Columbus Con., Alta, the new plant is scheduled to go into commission in the next fifteen days. "More furnaces" is the refrain "More furnaces!" is the refrain

from the diggings.

The day in the open market closed on settlements amounting to \$83,700, McCornick & Co. reporting them as they follow: American bullion, \$49,200; gold, silver, lead and copper ores, \$24,500. In the metal market silver ruled at 7 cents an ounce, lead at \$3.50 to \$4.10 per hundred pounds, and casting copper

# AGAINST THE DYKE.

at 11% cents a pound.

Management of the Albion Rapidly Nearing the Promised Land.

The long tunnel with which the management of the Albion of Alta is headed for known ore bodies has, at 2100 feet under cover, butted up against a porphyry dyke, and, unless the rule is betrayed, the management will break into ore with the punching of a hole through it. In that there have been no exceptions to this experience at camp, certainly the management of the Albion has no reason to apprehend one rose. certainly the management of the Albion has no reason to apprehend one now. For some time it has been apparent that an ore body was being approached, the fine mineralization in the tunnel giving way to the dyke through which the avenue is now being pushed with all possible energy. The width of the dyke, however, can only be conjectured. In the upper workings its width was between thirty and forty feet.

# THE TRIBUNE NEWS STANDS. Crop of Copper for the Month

Well Defined and Profitable Gains Over Previous Year, With Further Increase Assured.

The August output of pig-copper, in ombination with gold and silver, closed on another record, and yet trifling disabilities at some of the plants prevented the crop that would have otherwise been harvested. From the furnaces making "a specialty" of this product, which includes all but those operated by the American, there was forwarded to the Eastern refineries during the month 3,744,986 pounds, com-pared with 2,573,580 pounds for the cor-responding period last year, the record at the various smelters closing as fol-

Copper bullion contained in A. S. & R. company matte..... 900,000

While the record is a gratifying and, in contrast with that for August a year ago reveals a tremendous gain, it will, positively, be exceeded by the retord on which the furnaces of the valley started at midnight. It is said that when the month terminated last night at the furnaces of the Utah Con. the management was frying the metallic contents from 750 tons of ore daily, with not a little to embolden the belief that this will be increased to over 800 with very little coaxing. That the United States did not come up with a bigger record in August was that the tramway at the company's Bingham system of mines "went to pieces" while the management was undertaking to splice the cable and was idle while a new cable was being strung, while the output of the Bingham Com's furnaces was reduced to three blasts, while im proved means with which to handle the siag were being installed. At the latter, however, a fifth furnace will have been added to the battery during the present month, while there is nothing to prevent a new record at the United States company's furnaces, with one at the Utah Con, positively assured. While the value of the August output

of the copper furnaces cannot be ac-curately told, it no doubt exceeds \$1,000,000.

### ASTONISHING RESULTS.

Splendid Achievements Being Recorded at Copper Company's Plant.

Frank G. Janney, general superintendent of the Utah Copper company's mill in Bingham canyon, came in from camp again during the day to onfer with Manager Jackling. At the plant he reports everything in the most satisfactory condition, with September opening on assurances of a record that cannot but astonish its adherents. The new set of vanners are now being rapidly installed, as are the additional tables, while with present equipment he is reducing 450 tons of copper, gold and is reducing as tons of copper, gold and silver-bearing porphyry daily to a car-load of very high-grads concentrates, with this record to soon dwindle into insignificance. Meanwhile the copperbearing zone is opening up beyond all expectations, the new work on the east side of the canyon and through the Quinn tunnel disclosing the gratifying conditions. Superintendent Janney will leave for camp again today.

# YAMPA DOING BUSINESS

Steady Increase in the Output of Matte at Bingham Plant.

The month at the Yampa smelter at Singham Canyon closed on an output of ighteen carloads of copper matte running well up in gold and sliver and with the furnace doing its work most satisfactorily, under the direction of Manager Beilinger. In achieving these results he is now putting through from 176 to 250 tons daily, which tonnage is scarcely enough to keep the miner warm. However, a second furnace for which orders have been placed, will enable them to double the present output.

### Boston Market Irregular. Special to The Tribune.

Special to The Tribune.

BOSTON, Mass., Aug. 31.—Although the realizing sales in the New York market brought some selling orders into our local market, prices as a whole were well maintained and trading, excepting in some of the more active stocks, was light, and the disposition among traders seemed to be to await further developments in the New York market. Boston Conselidated was a feature and was largely traded in. The market closed irregular. Hornblower & Weeks, brokers, 33 State street. Boston, and 10 Wall street, New York, furnish the following quotations:

| Sales High | Low | Close | United States | 80 | 22.35 | 21.75 | 21.75 | Amaig | 2.496 | 857 | 6292 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 | 6294 | 856 |

To Build New Sampler,

To Build New Sampler.

That the Western Ore Purchasing company of Reno will extend its business by crecting an immense sampling plant at Mound House, in the immediate future, seems to be an established fact, according to advices received here from Carson and Virginia City. It is given out by parties there that already the concern has contracted with the General Electric company for seventy-five horse-power and that it has made other arrangements to go ahead with the work of building and equipping such a plant, says the Gazette of Reno, Nev.

According to stories which have reached the Gazette, the new plant would be at least three of four times as large as the one in Reno and would employ a large force of men. It would not interfere,

Did you learn tea cookery? When did you learn and who was your teacher?

Are you a real tea cook?

plant or in any way diminish its work.

Most of the mixing of ores would be probably done here and on account of the scary business from Goldfield and Tonopah the Beno sampling plant would still be run at its full capacity.

Utah in Boston.

The Commercial Bulletin, commenting on the Boston market during the past week, easys. 'Utah salled up across 49 with ease, and a campaign to put it to 50 is said to be on. It wouldn't be a bad swap to sell Utah on this rise and buy two U. S. Mining, It is admitted that the limit of Utah's carnings the next year or so will be \$5 a share, from which \$4 can be paid in dividends. U. S. Mining is earning \$2 now, and paying \$2, and with its lend stack in commission will add a dollar a share a year at least to its earnings, and can then pay \$3 in dividends. The swap would be on an income basis practically \$1 a year for \$5, not to speak of a probable advance in the market value of U. S. Mining.'

### Climax Company Incorporates.

Articles of incorporation of the Climax Mining and Milling company, organized in this city, were filed yesterday in the office of the County Clerk. The capital stock of the company is \$3,600, divided into 200,000 shares of the par value of 50 cents each. The properties of the company are situated in the Erickson Mining district in Tooele county. The following are the officers: Theodore Rownd, president J J Mason, vice-president and general manager, and W. D. Mathis, secretary and treasurer.

### Mining Notes.

The management of the South Swansea of Tintic drew down the proceeds of two more carloads of ore yesterday. Manager Channing of the Utah Con de-sarted for the mines at Bingham again

esterday morning. Chester S. Batchelder, formerly identi-ed with the smelters of this valley, came own from his home at Spokane yester-

John M. Hayes, cashier of the Utah lopper company, has gone to Bingham. Another consignment of ore from the Scottish Chief, out of Park City, is prom-sed in a few days.

Manager John T. Hodson of the Lincoln mines and mill out of Roise Ida, mar-keted another consignment of high-grade concentrates from the plant during the

It having been demonstrated that ample water with which to meet the requirements of a concentrator for Hoston Consess may be had at the Evans farm in the valley, work has been suspended until be resure of Mr. Newhouse, who sails for home September 7.

A letter from Bingham says the Queen mill, on the Butterfield company's prop-erties, has been started up as scheduled, with F B. Whitmore as its superintend-ent, and with everything running most satisfactority. nt, and with attactority. The Unche Sam of Tintic has another of of concentrates on the way to market. Favorable reports continue to come from the Butler of Bingham.

The Carisa of Tintic is at the sampler with another lot of ore.

The Tetro of Tintic will pass around another piece of bread-money today.

The recent consignment of silver and lead ore from the E & F. group, out of Pieche, will be disposed of on today's market.
